Relevant Experience

Junior Software Developer
2023 – present

GAVA IFC | Milano, Italy

- Writing code within the GeneXus framework, designing and developing solutions.
- Help to solve complex problems and provide efficient solutions.
- Effective communication and collaboration with other team members.
- Creating rapid and effective prototypes.
- Designing data models, including defining database structures and relationships.
- Writing queries using GeneXus-specific syntax.
- Utilizing GeneXus's built-in debugging tools to identify, explore, and resolve errors within the development environment.

Front End Developer & Digital Creator
2020

Freelance | Remote

- During my freelance period, I specialized in front-end web development, utilizing React JS, HTML, and CSS to create visually appealing and interactive websites. I collaborated with clients to understand their requirements and implemented responsive designs that optimized user experiences.
- In addition to my web development expertise, I embraced my passion for digital content creation, utilizing various skills such as design, photography, writing, copywriting, and social media management to enhance online presence and engage with audiences effectively.

Full-Stack Developer
2019- 2020

Escobedo Medina Auditores Asociados | Cajamarca, Peru

- At Escobedo Medina Auditores Asociados, I had the opportunity to contribute with my skills and expertise to the development of various projects. During my time there, I acquired solid foundation as a Fullstack Developer, equipped with the ability to tackle complex challenges and deliver innovative software solutions.
- Web-based ERP Development.
- Desktop App Enhancement.
- Deep understanding of both front-end and back-end technologies: React JS, Node.js/Express, VB .NET, MySQL, and UI/UX design.
- Team working, collaboration and effective communication.
